

Aquapure[™] pH UP

Aquapure pH UP is a liquid alkaline concentrate. It is used for pH adjustment in waste treatment systems. Aquapure pH UP is specifically designed for systems that cannot tolerate high sodium contents – such as with caustic soda or soda ash. Aquapure pH UP contains no sodium.

Because it is a liquid, Aquapure pH UP may be pumped or metered into a system directly. It will go into solution instantaneously raising the pH. Aquapure pH UP may be used with any type of pH or ORP probe.

The addition of Aquapure pH UP will cause no rise in temperature – as with caustic soda pellets.

Liquid alkaline	No problems with reuse of
concentrate	water
No sodium	Mineral oil base with
	emulsifiers and stabilizers
Wide application use	Can be used anywhere foam is
	a problem or foam free effluent

Features & Benefits

Waste Disposal

Aquapure pH UP is highly alkaline. It should be neutralized with acid to a pH of 6.0 - 8.0 or whatever the discharge permit requires. Allow any solids to settle. Dispose in accordance to local regulations.
